

关于航行美国水域船舶的无线电台使用频率的通告

各有关公司：

美国联邦通讯委员会（U.S. Federal Communication Commission）Enforcement Bureau 近期指出有部分外国旗船舶在停靠美国港口期间使用无线电通信设备通过462.550MHz-467.725Mhz频率进行通信。在美国，该波段已分配给了在通用移动电台服务（GMRS）上注册的陆上移动电台用户使用，为避免对在美国的陆上移动电台用户的干扰，Enforcement Bureau 要求船舶应避免在美国水域内使用上述频率。

国际电信联盟（ITU）已经在ITU规则里对此做了相应规定：“5.288: 在美国和菲律宾国内水域，船上通讯设备的首选频率应该是457.525MHz、457.550MHz、457.575Mhz和457.600MHz，其对频相应是467.750MHz、467.775MHz、467.800Mhz和467.825MHz。使用设备的性能应满足Recommendation ITU-R M.1174”。

MARINE SAFETY ADVISORY NO. 34-06

To: Regional Marine Safety Offices, Nautical Inspectors, Masters, Owners/Agents

Subject: OBSERVANCE OF USA COMMUNICATIONS REGULATIONS

Date: 6 November 2006

The following was provided by the Enforcement Bureau of the U.S. Federal Communication Commission, District Director, Philadelphia, Pennsylvania.

The FCC Enforcement Bureau has received complaints that foreign flag ships in United States ports are using radio transmitting equipment on frequencies between 462.550 MHz and 467.725 MHz. In the United States these frequencies are authorized for licensed land mobile radio users in the General Mobile Radio Service (GMRS). To avoid causing interference to radio users licensed in the U.S., ships should avoid using these frequencies in U.S. waters.

The International Telecommunications Union (ITU) addresses this issue in the ITU Rules and Regulations with the following note: "5.288: In the territorial waters of the United States and the Philippines, the preferred frequencies for use by on-board communication stations shall be 457.525 MHz, 457.550 MHz, 457.575 MHz and 457.600 MHz paired, respectively, with 467.750 MHz, 467.775 MHz, 467.800 MHz and 467.825 MHz. The characteristics of the equipment used shall conform to those specified in Recommendation ITU-R M.1174."

Foreign ships in U.S. territorial waters should use the preferred frequencies listed above and avoid using the frequency range from 462.550 MHz to 467.725 MHz.
