issued by Maritime and Port Authority of Singapore**

The Marine Environment Protection Committee of IMO, approved the RESOLUTION MEPC.189(60) - AMENDMENTS TO THE ANNEX OF THE PROTOCOL OF 1978 RELATING TO THE INTERNATIONAL CONVENTION FOR THE PREVENTION OF POLLUTION FROM SHIPS, 1973 (Amendments to Annex I), and the RESOLUTION MEPC.190(60) AMENDMENTS TO THE ANNEX OF THE PROTOCOL OF 1997 TO AMEND THE INTERNATIONAL CONVENTION FOR THE PREVENTION OF POLLUTION FROM SHIPS, 1973, AS MODIFIED BY THE PROTOCOL OF 1978 RELATING THERETO (Amendments to Annex VI) on 26 March 2010 respectively, both of them will enter into force on or after 1 August 2011. For those Administrations which

authorized CCS to conduct the statutory survey are Parties to the Annex I or Annex VI to the MARPOL 73/78 Convention, this Society will implement these two Resolutions in due time unless the special requirements will be instructed by Flag States.

As the Party to the Annex I and Annex VI to the MARPOL 73/78 Convention, Singapore released the Shipping Circular to Shipowners No.13 of 2011 on 28 June 2011, aforementioned IMO resolutions are incorporated into their national legal system, and the national Regulations, namely the Prevention of Pollution of the Sea (Oil) (Amendment) Regulations 2011 and the Prevention of Pollution of the Sea (Air) (Amendment) Regulations 2011, will be published in the Government Gazette. Related documents are attached therein with key points summarized as below for any interested party to be taken into account and apply:

Section One: Resolution MEPC.189 (60)

A new chapter 9 - SPECIAL REQUIREMENTS FOR THE USE OR CARRIAGE OF OILS IN THE ANTARCTIC AREA is added to MARPOL Annex I, it stipulates that, after 1 August 2011, the carriage in bulk as cargo or carriage and use as fuel of the "heavy grade oil" (Regulation 21 of the revised Annex I of MARPOL 73/78, further amended by MEPC.141(54)) shall be prohibited in the Antarctic area (i.e. the sea area south of latitude 60°S), exception of vessels engaged in securing the safety of ships or in a search and rescue operation.

For the applicable ships, shipowners or ship management companies have the responsibility to ensure that the requirements of MEPC.189 (60) are followed during the ship service and the relevant evidence are kept onboard the ship for inspection conducted by Flag State or PSC. According to the

MEPC.189 (60), the cleaning or flushing of tanks or pipelines is not required when prior operations have included the carriage or use of “heavy grade oil”.

Section Two: Resolution MEPC.190 (60)

Revised Annex VI of MARPOL 73/78 is amended by MEPC.190 (60), the North American area is designated as the “Emission Control Area” which is regulated by Reg.13.6 relating Nitrogen Oxides (NO_x), and by Reg.14.3 relating Sulphur Oxides (SO_x) and Particulate Matter respectively. Specific areas of the North American area are described in the new appendix VII. MEPC.190 (60) will enter into force on or after 1 August 2011.

1. For ships constructed on or after 1 January 2016 and are operating within the “Emission Control Area” (i.e. the North American area), the operation of a marine diesel engine which is installed on those ships shall be compliance with the NO_x Tier III standards as described in the Reg.13.5.1.1 of Revised Annex VI of MARPOL 73/78 in terms of the emission of NO_x from the engine; while ships are operating outside the “Emission Control Area”, the operation of a marine diesel engine which is installed on those ships shall be compliance with the NO_x Tier II standards as described in the Reg.13.4 of Revised Annex VI of MARPOL 73/78.
2. Shipowners and shipbuilders should purchase and install the marine diesel engine which is in line with the relevant requirements for applicable ships, the engine should be issued the EIAPP Certificate and the associated Technical File should be kept on board the ship. According to the current level of technology, in order to meet the NO_x Tier III standards, in general the engine should be fitted with NO_x reducing devices such as Selective Catalytic Reduction (SCR) systems, it means that the designer needs to consider to adjust the machinery space arrangement at least. In

addition, only for the special circumstances (please refer to Reg.13.5.2) the engine meets the NOx Tier II standards enough.

3. According to Reg.14.3, on or after 1 August 2011 the North American area is the new “Emission Control Area” and in general when ships are operating within the North American area on or after that date, the sulphur content of fuel oil used on board ships shall not exceed 1.00% m/m limits, any detailed data such as fuel-oil-change-over operation relating entering or leaving the North American area shall be recorded in the log-book as per Reg.14.6 when those ships use separate fuel oils not complying with Reg.14.4 and enter or leave the North American area, and the bunker delivery note (and associated representative sample of the fuel oils) which is compliance with Reg.18 shall be kept on board the ship. However, during 1 August 2011 and 1 August 2012, ship operating in the North American area can be exempted from the aforementioned requirements as per Reg.14.7 unless the Administrations have special requirements. For those ships for which the Administrations are not the Parties to the Annex VI to the MARPOL 73/78 Convention, CCS will deal with it as the same way described here.
4. For CCS classed ships for which the supplement to IAPP Certificate has been marked as those ships do not enter the “Emission Control Area” stipulated in Reg.14, but it intends to enter the North American area on or after 1 August 2011, an application should be submitted to CCS, IAPP Certificate will be renewed and survey reports will be issued after completion of relevant survey.
5. For ships constructed on or after 1 January 2016 and will not operate within the “Emission Control Area” stipulated in Reg.13 (i.e. the North American area), according to the application from shipbuilders, shipowners or ship management companies, the supplement to IAPP Certificate will be marked and relevant notes will be given.
